

```
1 -----
2 #step 1: have a gmail address or github account
3 -----
4
5 1. You need to know your password.
6 2. once you know your account user name and password,
7 go to:
8
9 https://www.magikcraft.io/
10
11 Click "try it now!"
12
13 When it comes up with "login", choose github or google
14 and follow the instructions.
15
16
17 -----
18 #step 2: create 1 spell
19 -----
20
21 When you are logged into magikcraft, click "Editor"
22
23 A page will come up that says "My Spells"
24
25 Click "new"
26
27 A box will appear on the right with this text in it:
28
29 -----
30 const magik = magikcraft.io
31
32 function main() {
33
34 }
35 -----
36
37 You should add one line of trashtalk in the function,
38 like this below. You can say what you want, but keep it PG.
39
40 -----
41 const magik = magikcraft.io
```

```
42
43 function main() {
44     magik.dixit("I'm the best!")
45 }
46 -----
47
48 click "Save trashtalk" at the bottom right.
49 Make sure it saves. sometimes it's a little wonky.
50 if it doesn't save, reload the page, retype, and click save.
51
52
53 -----
54 #step 2: have minecraft java edition on your computer
55 -----
56
57 Inside minecraft, under "installations," makes sure you have
58 minecraft 1.14.4. If you don't have it, click "new" and choose
59 it from the list. You can name it "magikcraft 1.14.4"
60
61 Once you have that, click on that and choose play.
62
63 When the app loads, choose "multiplayer"
64
65 click "Add Server"
66
67 For the name type "Magikcraft 1.14.4"
68 For the address, type "play.magikcraft.io"
69
70 Then click on the server and enter the game.
71
72 Hopefully it will load your spells.
73
74 Type /spells to see your spells.
75
76 To cast the "trashtalk" spell, type:
77
78 /cast trashtalk
79
80
81
82
```

```
83 -----
84 More spells
85 -----
86
87 #fireball
88
89 -----
90 const magik = magikcraft.io;
91
92 function main(num){
93
94     magik.dixit("here comes " + num + "fireballs!")
95     magik.infierno(num);
96
97 }
98 -----
99
100 #magikcarpet
101
102 -----
103 const magik = magikcraft.io;
104
105 magik.declaro('elytra');
106 -----
107
108
109 #blink
110 -----
111 const magik = magikcraft.io
112
113 function main() {
114     const there = magik.aspecto();
115     magik.ianuae(there);
116 }
117 -----
118
119
120 #speak
121 -----
122 const magik = magikcraft.io;
123
```

```
124 function main(word1="", word2="", word3="", word4="", word5=""){
125     magik.dixit(word1 + " " + word2 + " " + word3 + " " +
... word4 + " " + word5)
126 }
